HISTORICAL

The State Teachers College was founded by act of the Legislature in 1910 under the name of Mississippi Normal College. The name was changed to State Teachers College in February, 1924. The act of 1910 merely gave the permission for the establishment of a teachers training college, but made no appropriation for purchase of site or erection of buildings. The same Legislature gave authority to counties and cities to issue bonds to offer a bonus for the location of the college. Under this permission three progressive communities submitted bids for the location. These were Laurel and Jones County, Jackson and Hinds County, Hattiesburg and Forrest County. The bids ranged in value from \$225,000 to nearly \$300,000. Hattiesburg was awarded the location on a cash bonus of \$260,000, a gift of 840 acres of land and other valuable considerations.

The report of the Board of Trustees of the State Teachers College submitted to the Legislature in January, 1912, closed with the following statement:

"We cannot close this report without a special word of appreciation and commendation for the liberal spirit that was shown by the citizens of the three cities and counties that made such magnificent offers for the location of this college, and especially do we wish to express our gratitude and sense of deep obligation to the people of Hattiesburg and Forrest County for their magnificent gift. We think that the people of Mississippi cannot but share our feelings in this matter; and we believe that they will applaud any action of their representatives in giving liberal support to an institution that is so vitally important to our educational system."

In response to the appeal of the trustees the Legislature of 1912 made appropriation for equipment of the buildings under construction and for maintenance up to December 31, 1913.

With this total investment of a little more than \$325,000 in buildings and equipment (not including the value of the 840 acres of land) the State Teachers College opened its doors for students on September 18, 1912.

During the first session the enrollment was 876. During the session of 1923-24 the enrollment was 1602. The total number of individual students enrolled for the thirteen years was 9,136.

During the first ten years of the life of the college there were two regular courses—one, the Certificate course, leading to a five-

year first grade state license; the other, the Diploma course, leading to a professional life license. During the 1922 session of the Legislature a bill was passed authorizing the college to grant degrees. Up to the close of the thirteenth session the college had issued 1,750 certificates, 448 diplomas, and 93 degrees.

The purpose for which this institution exists is to train teachers for the public schools of Mississippi. At the time of the establishment of the college it was recognized that the greatest need for improvement in teacher training was in the rural schools. On account of low salaries and short terms there were very few teachers in these schools whose preparation included any college work or any professional training. Indeed, the majority of them did not even have high school training.

In order to induce these teachers to take advantage of the opportunity offered by this college the certificate course was placed within their reach. The result was that hundreds of them took advantage of this opportunity and have gone out into the rural districts in every county of the state, and have had much to do with the marvelous improvement of the country school during the past decade.

The standard of the certificate course and of the diploma course has been raised from time to time as rapidly as conditions permitted. The present certificate course is based on graduation from a 15 unit high school and covers one year of college work. The diploma course is based on high school graduation and covers three years of college work. The degree course is based on high school graduation and covers four years of college work.

In January, 1911, the presidency of the institution was offered to H. L. Whitfield who was at that time President of the I. I. & C. at Columbus. After due consideration Mr. Whitfield decided to remain at Columbus. The trustees then elected as president W. H. Smith who was then State Supervisor of Secondary Schools. Mr. Smith served as head of the college, without resigning the other position, till the fall of 1911, when he decided to retain his position as State Supervisor of Secondary Schools. In October, 1911, the trustees offered the presidency to Joe Cook, who was then Superintendent of the Columbus City Schools. Mr. Cook accepted the position and has served continuously as president of this college since that date.
